*Primary Care Physician **Family Physician***

Family medicine (FM), formerly family

practice (FP), is a medical specialty devoted

to comprehensive health care for people of

all ages. The specialist is named a family

physician or family doctor. In Europe, the

discipline is often referred to as general

practice and a practitioner as a general

practice doctor or GP. This name emphasizes

the holistic nature of this speciality, as

well as its roots in the family.

Family medicine - Wikipedia

family physician a medical specialist who

plans and provides the comprehensive primary

health care of all members of a family,

regardless of age or sex, on a continuous

basis. See also family practice. resident

physician a graduate and licensed physician

learning a specialty through in-hospital training.

Family physician | definition of family physician by ...

1) Family physicians oversee your preventive care. Educating patients in disease prevention and health maintenance is one of the biggest functions a family doctor performs. They care for your entire being, including your mental and emotional needs. This might take the form of helping you with:

5 Roles of a Family Practitioner Doctor | Live Better ...

A family doctor is one who takes care of the whole family. Many doctors train in a specialty area of medicine. However, family doctors are trained in all areas of medicine. They care for you as a whole person through all stages of your life, regardless of your age or sex. This includes care for your physical, mental, and emotional health.
