Black hole Firewalls - with Sean Carroll and Jennifer Ouellette "The Black Hole Information Paradox: A Resolution on the Horizon?" Netta Engelhardt, MIT Enoch is Shown The Prison of Fallen Angels... A Black Hole The Black Hole

A black hole is a region of spacetime where gravity is so strong that nothing—no particles or even electromagnetic radiation such as light—can escape from it. The theory of general relativity predicts that a sufficiently compact mass can deform spacetime to form a black hole.. The boundary of the region from which no escape is possible is called the event horizon.

Black hole - Wikipedia

The Black Hole is a 1979 American dark science fiction film directed by Gary Nelson and produced by Walt Disney Productions. The film stars Maximilian Schell , Robert Forster , Joseph Bottoms , Yvette Mimieux , Anthony Perkins and Ernest Borgnine , while the voices of the main robot characters are provided by Roddy McDowall and Slim Pickens (both uncredited).

The Black Hole (1979 film) - Wikipedia

A black hole is a place in space where gravity pulls so much that even light can not get out. The gravity is so strong because matter has been squeezed into a tiny space. This can happen when a star is dying. Because no light can get out, people can't see black holes. They are invisible.

What Is a Black Hole? | NASA

Black hole, cosmic body of extremely intense gravity from which nothing, not even light, can escape. A black hole can be formed by the death of a massive star . When such a star has exhausted the internal thermonuclear fuels in its core at the end of its life , the core becomes unstable and gravitationally
