Waste and Want by Susan Strasser is about a nexus which unites a broader story of economic transformation - Strasser ' s subject is trash. Defining trash conceptually as something which is out of place and unusable to us Strasser uses it as the lynchpin of an examination of the journey of American society from largely self-sufficient colonial agriculture to modern consumer culture.

Strasser charts the triumph of "disposable" goods - paper cups, toilet paper, packaged food - those signature products of modern life. And she shows how Americans became hooked on convenience, fashion, and constant technological change - as the mountains of garbage rose higher and higher."--Jacket.

---

Classify different types of waste: Healthcare and related ...

Waste (or wastes) are unwanted or unusable materials.Waste is any substance which is discarded after primary use, or is worthless, defective and of no use. A by-product by contrast is a joint product of relatively minor economic value.A waste product may become a by-product, joint product or resource through an invention that raises a waste product's value above zero.

---

Waste - Wikipedia

Before the 20th century--when mass production, post-WWII consumer culture and planned obsolescence created a society in which disposability was the norm--broken crockery, food, buttons, bones, fat,...
